

Text of a pamphlet which defines common terms in the gender- and sexual-identity communities, including androgeny, butch, camp, drag, femme, and transvestite.

This pamphlet is designed to give heterosexuals and people who are just starting to think of coming out some basic common terms with the gender and sexual identity communities, so that they can speak somewhat intelligently with members of these communities without seriously offending people or appearing totally clueless. Keep in mind that:

The definitions of these words are not standardized throughout society, and are used differently by different individuals and in different regions. In particular, these definitions assume the existence of two and only two each of sexes, genders, and sex/gender roles, which are separate and distinct from one another; but many people see them as overlapping, closely related, or as a limited view or model of a much richer reality.

The meanings of words change over time. Changes in thinking and attitudes toward sexual and gender identity are taking place in society as a whole and within the sexual and gender identity communities. The meanings of these words will continue to change. For instance, some words are listed. For example, there is a slow but clear movement in society away from thinking of most human behaviors as appropriate to one sex and not appropriate to another, toward thinking of most human behaviors as appropriate to both sexes and both genders.

Definitions in (this early version of) this pamphlet were gathered by a bisexual-identified white male from the Midwest and Northeast of the US. In other parts of the world and other communities than those he is familiar with, the same terms may mean different things, and other terms may be used for the same and other important meanings.

Despite these caveats, many people find the terms listed here useful in varying degrees for describing their experience, if only as a starting point for describing how their view of the world differs from that represented here.

Corrections and additions to these words and definitions (from the US and elsewhere) are welcome. Please send them to the ECBN address at the end of this pamphlet.

Sexual Identity and Gender Identity are similar in some ways and very different in others. Both refer to how one thinks of a person. The existence and perpetuation of gender and sexual identities is based in the historic and continuing oppression (systematic mistreatment condoned by society as a whole) of people do not conform to certain aspects of society's gender roles. Gender roles refer to the clothing, behaviors, thoughts, feelings, relationships, etc., that are considered appropriate or inappropriate for members of each sex.

However, sex, gender identity, and sexual identity refer to different aspects of oneself. Therefore, one may be any combination of sex (male/female), gender (masculine/feminine), and sexual identity (straight, bisexual, lesbian/gay.) In recent history, people oppressed on the basis of different sexual identities (bisexuals, lesbians, gay men) and people oppressed on the basis of gender identity have formed communities which are partly separate and partly overlapping with one another. Because of this historic separation, someone who is a member of one of these communities does not necessarily understand and prioritize the issues of others of these communities. One who belongs to more than one of these communities may feel welcome in both, but usually neither addresses all one's needs or the way that one's needs from different

Gender identity refers to how one thinks of one's own gender: whether one thinks of oneself as a man (masculine) or as a woman (feminine.) Society prescribes arbitrary rules or gender roles (how one is supposed to and not supposed to dress, act, think, feel, relate to others, think of oneself, etc.) based on one's sex (whether one has a vagina or a penis.) These gender roles are called feminine and masculine. Anyone who does not abide by these arbitrary rules may be targeted for mistreatment ranging from not being included in people's circle of friends, through the cold shoulder, snide comments, verbal harrassment, assault, rape, and murder based on one's (perceived) gender identity.

Sexual identity refers to how one thinks of oneself in terms of whom one is sexually and romantically attracted to, specifically whether one is attracted to members of the same gender as one's own or the other gender than one's own. Society prescribes arbitrary rules that one should be sexually and romantically attracted to members of the other gender than one's own, and should not be attracted to members of the same gender as one's own. Anyone who does not abide by these arbitrary rules may be targeted for mistreatment ranging from not being included in people's circle of friends, through the cold shoulder, snide comments, verbal harrassment, assault, rape, and murder based on one's (perceived) sexual identity. (See homophobia and biphobia.) When one's sex and one's gender identity are different, one may base one's sexual identity on either one. Alternatively, one may have two sexual identities, one as a man and one as a woman.

These are terms often used within the sexual identity and gender identity communities. Self-identification terms are often spelled with initial caps (e.g. Queer, Bisexual) to emphasize that they refer to how one think of oneself, rather than how someone else labels one. (For instance, researchers often classify bisexual-identified women and men as lesbians and gay men and transvestites as transsexuals, obscuring important distinctions.)
